

Allowing access from other hosts

To allow access from your workstation (to use mysqladministrator?) you must allow access.

```
mysql> update user set host='10.125.0.3' where user='root' and host='localhost';  
Query OK, 1 row affected (0.00 sec)  
Rows matched: 1  Changed: 1  Warnings: 0  
  
mysql> flush privileges;  
Query OK, 0 rows affected (0.05 sec)
```
