

Install openSUSE via SSH

To install a server over SSH do the following:

- insert CD/DVD into the machine and boot
- on the kerneloptionsline type:

```
usssh=1 sshpassword=sdr tjgbskdhg hostip=1.1.1.1 netmask=255.255.255.0 gateway=1.1.1.1
```

- boot the machine
- you can continue the installation using an SSH session from a workstation.
