

# Swap file on BTRFS

Then start GParted or another disk management app, delete the swap partition, expand your partitions (BTRFS can be grown online, no need for reboot).

Create a subvolume to store your swap. Then create a swap file:

[https://wiki.archlinux.org/title/Swap#Swap\\_file](https://wiki.archlinux.org/title/Swap#Swap_file)

You may wish to disable Copy On Write on your swap file.
