

# Icedtea error on starting java in browser

Since the latest patch you get this error:

```
"icedteanp plugin error: Failed to run /usr/lib/jvm/java-1.6.0-openjdk/jre/bin/java. For more detail rerun "firefox -g" in a terminal window."
```

The resolution is this:

In the following directory type the following for 32 bit:

```
host:/usr/lib/jvm # ln -s java-1.6.0-openjdk-1.6.0/ java-1.6.0-openjdk
```

64 bit:

```
host:/usr/lib64/jvm # ln -s java-1.6.0-openjdk-1.6.0/ java-1.6.0-openjdk
```
