

# Install ATI/NVIDIA drivers in Opensuse 11

Or commandline friendly

```
su -c "OCICLI http://opensuse-community.org/ati.ymp"
```

```
su -c "OCICLI http://opensuse-community.org/nvidia.ymp"
```

One more commandline way via zypper:

NVIDIA:

```
zypper sa http://download.nvidia.com/opensuse/11.0 nvidia
```

```
zypper in x11-video-nvidiaG01
```

ATI:

```
zypper sa http://www2.ati.com/suse/11.0 ati
```

```
zypper in x11-video-fglrxG01
```

## Other codecs etc

Open terminal to run these commands or click on the link in web browser:

Compiz Fusion with almost everything:

```
su -c "OCICLI http://download.opensuse.org/repositories/X11:/XGL/opensUSE\_11.0/compiz-fusion-all.ymp"
```

Codecs pack for Gnome:

```
su -c "OCICLI http://opensuse-community.org/codecs-gnome.ymp"
```

Codecs pack for KDE:

```
su -c "OCICLI http://opensuse-community.org/codecs-kde.ymp"
```

When NVIDIA and ATI drivers are available, they can be installed in a same way too.

Note: Quotes are necessary, make sure there is no “wordpress effect” when you copy paste the above commands in shell
