

# KDE4

- [kmail](#)

## KDE4 has some new apps:

- Dragon - MM player
- Kscd - CD player
- Ksystemlog - Handy system log viewer, also realtime! View syslog, X-server log, kernel & others
- Dolphin - Filemanager. Check it out, awesome
- Marble - Geo prog
- Ksysguard - Processmonitor. Cool -> also displays output from progs NOT started from terminal!!
- Libksane - scan library

## Other things to try:

- kid3 - Kid3 easily tags multiple MP3, OGG/Vorbis, FLAC, MPC, MP4/AAC, MP2, Speex, TrueAudio and WAV. It supports ID3v1.1, ID3v2.3, ID3.2.4. This Package is available from the KDE:Community repository in the openSUSE Build Service.
- <http://vavai.net/2008/10/28/making-a-local-copy-of-opensuse-repository-mirror-server/>
- [Fix suspend to RAM on a HP8530p EliteBook on OpenSUSE 11.2](#)
- [clear recently used documents permanently in KDE4](#)
